1/ Ethnicity is based on the ethnicity of the father and mother (four possible listings for each parent). Definitions used in this table differ from those in reports by the U.S. Census Bureau. In the 1980 and 1990 census tabulations, a person's ethnicity was determined by self-identification or by the race of the mother, thus mixed race was not a separate category. For the Census 2000, people were allowed to select more than one race.

2/ Number of cases in sample numerator was less than 5 and/or denominator was less than 50. There were too few cases to be reliable so the data was not presented.

3/ Includes other ethnicities not listed, don't know, refused or missing (57,394). The figure shown is the weighted figure.
