NA = Not available.

(Note new "weights" on components for second to fourth quarters.)

Note: The ACCRA Cost of Living Index measures relative price levels of 59 consumer goods and services for a mid-management standard of living in 295 urban areas in the United States. The average for all participating places equals 100, and each participant's index is read as a percentage of the average of all places. The Index is produced quarterly.
